

100 Video Codes

A compact workflow for ChatGPT + Higgsfield.

HIGGSFIELD AI

TURN YOUR IDEAS INTO VIDEOS

Connect Higgsfield to ChatGPT and create from your images.

OPEN HIGGSFIELD AI

John Savage AI's Higgsfield link

Your 3-step workflow

1

CONNECT

Add Higgsfield in ChatGPT and sign in.

2

UPLOAD

Attach your product photo and select Higgsfield.

3

CREATE

Choose a code, send it, then review the generated clip.

TUTORIAL + EXAMPLES + 100 TWO-WORD CODES

Use these as short creative prompts. Copy a code with its direction when you want a more specific result. The examples use the same white-camera reference.

[ALL MY SOCIALS](#)

Add Higgsfield to ChatGPT

Connect once, then create your videos in the chat.

1 FIND + ADD

Open the Plugins directory in ChatGPT and search Higgsfield. Or use the setup button below, choose ChatGPT, then Add Higgsfield plugin.

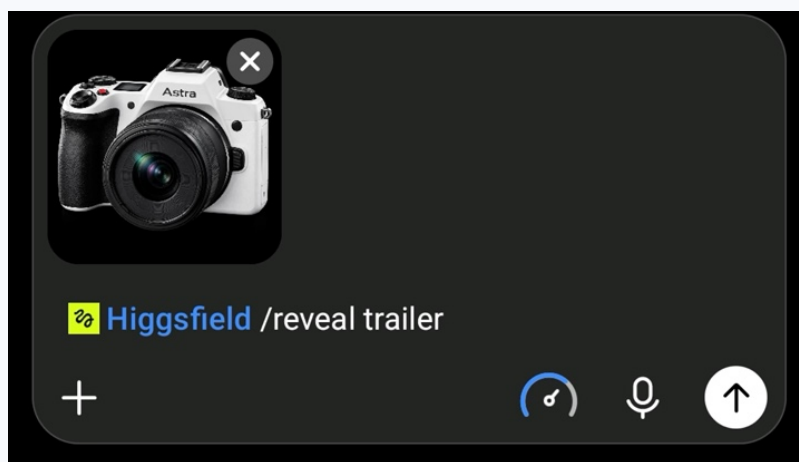

OPEN HIGGSFIELD SETUP

2 SIGN IN + SELECT

Sign in to your Higgsfield account. Start a new chat and select Higgsfield from the tools/plugins menu, or type @ and choose it.

3 ATTACH + PROMPT

Attach your image with +. Enter a code such as /reveal trailer. Choose an available video model, duration and aspect ratio, then generate.

Example setup: the white camera is attached and Higgsfield is selected.

To match this demo: Seedance 2.0, 6 seconds, 4:3. Keep the product design and color consistent with the reference.

[Official setup guide](#)

One reference, three results

Actual stills from the white Astra-camera generations.

REFERENCE IMAGE

Upload your product photo.

/water splash

Wrap a dramatic splash around the product.

/camera unboxing

Reveal the product inside premium packaging.

/exploded assembly

Separate components for an assembly sequence.

Copy the code into your chat with Higgsfield selected and your reference attached.

Pick a video direction

Copy one code + its direction. Reuse your attached product image.

Hero reveals

- 001 /reveal trailer**
Build a dramatic reveal with a strong final hero shot.
- 002 /cinematic commercial**
Turn the product into a polished cinematic ad.
- 003 /studio showcase**
Show the product under clean studio lighting.
- 004 /silhouette reveal**
Start in silhouette, then expose the product.
- 005 /curtain reveal**
Pull a fabric curtain away from the product.
- 006 /spotlight reveal**
Sweep a spotlight onto the hero product.
- 007 /shadow reveal**
Move shadows away to uncover the product.
- 008 /pedestal rise**
Raise the product on a sleek display pedestal.
- 009 /vault opening**
Open a heavy vault to reveal the product.
- 010 /portal entrance**
Bring the product through a glowing portal.

Product motion

- 011 /floating rotation**
Float the product through a slow, controlled turn.
- 012 /turntable spin**
Rotate the product on a physical display turntable.
- 013 /weightless drift**
Let the product drift gently in zero gravity.
- 014 /pendulum swing**
Swing the product smoothly across the frame.
- 015 /vertical lift**
Lift the product straight up into the hero position.
- 016 /spiral ascent**
Carry the product upward along a spiral path.
- 017 /slow tumble**
Tumble the product slowly through the air.
- 018 /magnetic hover**
Suspend the product above a magnetic display base.
- 019 /precision landing**
Lower the product into a perfectly aligned landing.
- 020 /orbital dance**
Move small accessories around a stationary hero product.

Pick a video direction

Copy one code + its direction. Reuse your attached product image.

Camera moves

021 /macro orbit

Orbit closely around the product's finest details.

022 /slow push

Move the camera slowly toward the product.

023 /dramatic pullback

Pull back to reveal the surrounding set.

024 /overhead glide

Glide above the product in a top-down view.

025 /low sweep

Sweep past the product from a low angle.

026 /arc reveal

Move along an arc to uncover the product's shape.

027 /side tracking

Track sideways while keeping the product centered.

028 /rack focus

Shift focus from a foreground detail to the product.

029 /dolly zoom

Change perspective with a controlled dolly zoom.

030 /wide orbit

Circle the entire product and its environment.

Assembly and packaging

031 /exploded assembly

Separate components neatly, then rebuild the product.

032 /camera unboxing

Unbox the reference camera in a premium presentation.

033 /lens transformation

Animate the camera lens into a new visual configuration.

034 /product unboxing

Open the packaging to reveal the uploaded product.

035 /component reveal

Expose the main components in an organized sequence.

036 /precision assembly

Bring individual parts together with exact alignment.

037 /magnetic assembly

Snap separate components together using magnetic motion.

038 /transparent housing

Reveal internal components through a clear outer shell.

039 /packaging fold

Fold flat packaging around the finished product.

040 /accessory arrangement

Arrange the product and accessories into a flat lay.

Pick a video direction

Copy one code + its direction. Reuse your attached product image.

Light and reflections

041 /neon reveal

Reveal the product with vivid neon edge lighting.

042 /bokeh bloom

Expand soft background lights into glowing bokeh.

043 /light sweep

Move a narrow light band across the product surface.

044 /prism lighting

Cast refracted rainbow light across the product.

045 /rim lighting

Outline the product with a bright rim of light.

046 /chrome reflections

Move crisp metallic reflections across reflective surfaces.

047 /golden glow

Wrap the product in warm golden light.

048 /laser scan

Pass a thin laser line across the product.

049 /caustic shimmer

Animate rippling light patterns around the product.

050 /shadow play

Use moving geometric shadows to frame the product.

Water and atmosphere

051 /water splash

Wrap a dramatic splash around the hero product.

052 /liquid orbit

Send a ribbon of liquid around the product.

053 /rain reveal

Reveal the product through falling rain.

054 /mist drift

Move soft mist around a clearly visible product.

055 /smoke halo

Form a ring of smoke behind the product.

056 /steam curl

Send delicate curls of steam through the scene.

057 /ice fracture

Crack a surrounding ice shell to reveal the product.

058 /frost bloom

Grow a fine frost pattern across the display surface.

059 /bubble rise

Lift streams of bubbles around the hero product.

060 /cloud parting

Part clouds to uncover a floating product.

Pick a video direction

Copy one code + its direction. Reuse your attached product image.

Materials and particles

061 /sand reveal

Blow loose sand away from the product.

062 /dust burst

Create a controlled burst of dust behind the product.

063 /powder explosion

Throw colored powder outward around the product.

064 /particle assembly

Build the product silhouette from moving particles.

065 /glass bloom

Unfold glass-like shapes around the hero product.

066 /paper sculpture

Build a sculptural paper set around the product.

067 /silk flow

Wrap flowing silk around the product, then release it.

068 /ribbon swirl

Swirl ribbons around a clean central product view.

069 /metal ripple

Ripple a metallic backdrop behind the product.

070 /crystal growth

Grow crystals around the product's display base.

Lifestyle settings

071 /lifestyle photography

Animate a natural lifestyle product scene.

072 /desk setup

Place the product in a carefully styled working desk scene.

073 /cafe moment

Show the product in a warm, lived-in cafe scene.

074 /urban night

Showcase the product in a neon-lit city at night.

075 /rooftop sunset

Reveal the product against a rooftop sunset.

076 /forest morning

Frame the product in soft early forest light.

077 /desert luxury

Present the product in a minimal desert setting.

078 /coastal breeze

Show the product with light coastal movement and texture.

079 /travel diary

Create a short travel-style sequence featuring the product.

080 /creative workspace

Show the product inside an active creative workspace.

Pick a video direction

Copy one code + its direction. Reuse your attached product image.

Editorial concepts

081 /gallery display

Present the product like a gallery sculpture.

082 /museum spotlight

Illuminate the product as a prized museum exhibit.

083 /brutalist stage

Place the product on bold concrete architecture.

084 /minimal geometry

Animate simple geometric forms around the product.

085 /monochrome world

Build the scene from a single coordinated color palette.

086 /pastel dream

Create a softly lit pastel product environment.

087 /retro futurism

Use a retro-futuristic set and stylized camera movement.

088 /cyberpunk showcase

Create a detailed futuristic product display.

089 /industrial elegance

Combine raw industrial surfaces with precise lighting.

090 /botanical frame

Frame the product with gently moving leaves and flowers.

Loops and transitions

091 /seamless loop

End on the same composition where the video begins.

092 /match transition

Connect two scenes using a matching product position.

093 /whip transition

Whip the camera into a second product scene.

094 /rotation transition

Use a product turn to move between environments.

095 /zoom transition

Zoom through a detail into a new product view.

096 /light transition

Use a passing light to reveal a second scene.

097 /portal transition

Move through a portal into another product setting.

098 /reflection transition

Travel through a reflection into the next shot.

099 /freeze orbit

Freeze the action while the camera moves around it.

100 /reverse reveal

Reverse a dramatic visual effect into a clean hero shot.
