347 /sizelevels

Show subject, component, microscopic structure, and molecular level.

348 /thenandnow

Compare an older generation with the current design.

349 /goodvsbad

Compare correct use or construction with a defective example.

350 /failuremode

Show where and how the object commonly fails.

351 /designlogic

Label features and explain why each design choice exists.

352 /hero

Create a clean hero image with the subject as the focal point.

Codeword directory

353 - 368 / 642

Every codeword includes one simple explanation.

353 /macro

Show extreme close-up texture and fine detail.

354 /materials

Identify and showcase the subject's key materials.

355 /texture

Emphasize surface texture, grain, and tactile detail.

356 /scale

Communicate the subject's real-world size clearly.

357 /silhouette

Reduce the subject to a bold recognizable silhouette.

358 /outline

Trace the subject with a clean explanatory outline.

359 /wireframe

Reveal the underlying geometric wireframe.

360 /transparent

Make the exterior transparent while preserving form.

361 /ghosted

Show hidden parts as faint ghosted structures.

362 /sectioned

Divide the subject into clearly labeled sections.

363 /unwrapped

Lay surfaces or packaging out as an unwrapped flat view.

364 /packaging

Place the subject into polished retail packaging.

365 /boxed

Present the subject neatly inside its box.

366 /unboxing

Arrange the product and contents as an unboxing scene.

367 /contents

Show everything included with the main item.

368 /accessories

Arrange compatible accessories around the subject.

Codeword directory

369 - 384 / 642

Every codeword includes one simple explanation.

369 /variants

Compare multiple product or design variants.

377 /concept

Turn the subject into a polished concept visualization.

370 /colorways

Show the subject in several coordinated color options.

378 /upgrade

Show a clear improved version of the subject.

371 /finish

Compare surface finishes such as matte, gloss, metal, or soft-touch.

379 /ergonomics

Explain how the subject fits the body and supports use.

372 /premium

Elevate the subject with restrained premium styling.

380 /grip

Focus on hand placement, grip surfaces, and comfort.

373 /minimal

Simplify the composition into a clean minimal presentation.

381 /controls

Label controls and connect each one to its function.

374 /industrial

Give the subject a robust industrial design language.

382 /interface

Explain the interface and its main interaction zones.

375 /retro

Restyle the subject with a coherent retro design language.

383 /workflow

Map the practical workflow from start to finish.

376 /prototype

Present the subject as a believable working prototype.

384 /usage

Demonstrate how the subject is used in context.

Codeword directory

385 - 400 / 642

Every codeword includes one simple explanation.

385 /setup

Show the correct setup and placement.

393 /durability

Visualize ruggedness, protection, and expected wear.

386 /installation

Show where and how the subject is installed.

394 /weatherproof

Show protection from rain, dust, heat, and cold.

387 /maintenance

Mark routine maintenance tasks and access points.

395 /thermal

Map heat generation, transfer, and hot zones.

388 /cleaning

Show the correct cleaning zones and method.

396 /cooling

Explain airflow, cooling paths, and heat removal.

389 /repair

Reveal the fault and the repair path.

397 /acoustic

Visualize sound sources, direction, and damping.

390 /replaceable

Identify parts designed to be replaced.

398 /pressure

Map high- and low-pressure areas.

391 /wearpoints

Highlight areas most likely to wear out.

399 /friction

Show contact points and friction zones.

392 /weakpoints

Identify likely weak points and failure risks.

400 /tolerance

Visualize fit, clearance, and manufacturing tolerances.

Codeword directory

401 - 416 / 642

Every codeword includes one simple explanation.

401 /joints

Reveal the subject's joints and connection methods.

409 /insideview

Show the interior without fully destroying the exterior.

402 /gears

Expose gears and show how they transfer motion.

410 /hiddenparts

Reveal concealed components or structures.

403 /electronics

Reveal the main electronic modules and wiring.

411 /seethrough

Make selected surfaces transparent.

404 /sensors

Map sensors, detection zones, and signals.

412 /peelback

Pull the outer surface aside like a flap.

405 /battery

Show battery location, access, and power path.

413 /schematic

Simplify the subject into a functional diagram.

406 /connectivity

Map wireless and wired connections.

414 /technicaldrawing

Show accurate front, side, and top views.

407 /comparison

Compare subjects or versions in matching views.

415 /isometric

Create an angled engineering-style view.

408 /benchmark

Compare performance against a clear reference or competitor.

416 /cadview

Present the subject like a CAD model.

Codeword directory

417 - 432 / 642

Every codeword includes one simple explanation.

417 /dimensionview

Add clear measurements around the subject.

425 /motionflow

Show how parts move during operation.

418 /dimensionlines

Draw technical measurement lines between points.

426 /inputoutput

Show what enters the system and what comes out.

419 /scalegrid

Use a grid to communicate size and proportion.

427 /forceanalysis

Show pressure, force, weight, or stress.

420 /vanishingpoint

Show the construction of perspective lines.

428 /flowdiagram

Show the movement of air, water, blood, or data.

421 /contourmap

Show height, depth, or surface levels with lines.

429 /rangeofmotion

Show how far joints or parts can move.

422 /howitworks

Explain the basic function visually.

430 /controlmap

Connect each control to its function.

423 /mechanism

Focus on gears, hinges, levers, or moving parts.

431 /buttonmap

Label buttons and explain what they do.

424 /energyflow

Show how power moves through the subject.

432 /portmap

Identify ports, sockets, and connection points.

Codeword directory

433 - 448 / 642

Every codeword includes one simple explanation.

433 /assembly

Show how separate parts become one object.

441 /decisiontree

Show what to do next at each choice.

434 /assemblysequence

Show assembly in numbered stages.

442 /repairguide

Show the problem and the repair path.

435 /disassembly

Show how to take the subject apart.

443 /problemresolution

Compare problem, diagnosis, and solution.

436 /stepsequence

Present a task frame by frame.

444 /maintenanceguide

Show regular service tasks.

437 /instructioncard

Create a compact visual instruction card.

445 /cleaningpoints

Mark where and how to clean.

438 /manualpage

Turn the subject into a manual-style page.

446 /filterreplacement

Explain how a filter is removed and changed.

439 /quickreference

Create a fast visual reference guide.

447 /lubricationpoints

Mark hinges, gears, or parts needing lubricant.

440 /checklist

Create a checklist of actions or parts.

448 /inspectionpoints

Highlight areas that should be checked.

Codeword directory

449 - 464 / 642

Every codeword includes one simple explanation.

449 /faultfinder

Highlight likely sources of failure.

457 /screenlabels

Label important screen elements.

450 /repairroute

Show the safest route through a repair.

458 /indicatorlights

Explain lights, symbols, and status indicators.

451 /replaceablepart

Identify the component that can be replaced.

459 /modechart

Compare different operating modes.

452 /hazardmap

Highlight dangerous areas or actions.

460 /statuscomparison

Show idle, active, paused, and finished states.

453 /safezones

Show where it is safe to touch or work.

461 /onandoff

Compare powered and unpowered states.

454 /warningpoints

Mark warnings directly on the image.

462 /errorstates

Show common error conditions.

455 /protectivegear

Show the safety equipment required.

463 /errorcodes

Explain visible error codes or warning symbols.

456 /controlpanel

Explain the control panel or interface.

464 /powerroute

Show where power enters and travels.

Codeword directory

465 - 480 / 642

Every codeword includes one simple explanation.

465 /chargingports

Identify charging connections and direction.

473 /accessoryfit

Demonstrate how an accessory attaches.

466 /batteryaccess

Show how to reach the battery compartment.

474 /adaptermatch

Show the correct adapter or connector.

467 /batteryplacement

Show battery position and orientation.

475 /mountingoptions

Compare available mounting methods.

468 /portlabels

Label every input and output port.

476 /cableorganization

Arrange cables in a clean, understandable layout.

469 /cablerouting

Show the cleanest cable paths.

477 /storagefit

Show how the item fits into storage.

470 /wiringpath

Visualize electrical wires and their destinations.

478 /carrycase

Place the item into a practical travel case.

471 /connectionmap

Map how parts connect to one another.

479 /spaceplan

Optimize the available space around the subject.

472 /compatibilitycheck

Show which parts or devices work together.

480 /scalecomparison

Compare size with a hand, person, or object.

Codeword directory

481 - 496 / 642

Every codeword includes one simple explanation.

481 /sizecomparison

Place several items beside each other by size.

489 /beforeafter

Show a change, repair, or transformation.

482 /proportionmap

Show ratios between important dimensions.

490 /oldnew

Compare an older and newer version.

483 /fitcheck

Show whether two parts or objects fit together.

491 /roomplacement

Show where the object fits in a room.

484 /clearancecheck

Show the free space required around the item.

492 /skeletonview

Show the supporting bones or framework.

485 /sidebyside

Compare two versions in matching views.

493 /cellularview

Zoom into cells or microscopic structure.

486 /featurematrix

Compare features in a visual grid.

494 /molecularview

Show the subject at molecular scale.

487 /proscons

Show advantages and disadvantages clearly.

495 /musclemap

Label major muscles and their positions.

488 /whichone

Present a visual recommendation between options.

496 /organmap

Label internal organs or internal systems.

Codeword directory

497 - 512 / 642

Every codeword includes one simple explanation.

497 /posturemap

Explain posture, balance, and body alignment.

505 /filmnoir

Use a high-contrast black-and-white look.

498 /gestureguide

Show a gesture or body position clearly.

506 /vintagefilm

Create an aged analog film photograph.

499 /behaviorsequence

Show actions or behavior in order.

507 /polaroid

Use an instant-camera print aesthetic.

500 /habitatview

Place a person or animal in its environment.

508 /35mm

Create a classic 35mm photograph.

501 /interactionmap

Show relationships between the subject and surroundings.

509 /fisheye

Use an extreme wide-angle perspective.

502 /firstperson

Show the scene from the subject's perspective.

510 /tiltshift

Make the scene look miniature.

503 /handsinframe

Show hands using or demonstrating the item.

511 /overhead

Show the subject directly from above.

504 /cinematic

Create a dramatic movie-frame composition.

512 /lowangle

Make the subject look powerful from below.

Codeword directory

513 - 528 / 642

Every codeword includes one simple explanation.

513 /topdown

Create a flat bird's-eye view.

521 /volumetric

Show visible rays through the air.

514 /panorama

Expand the scene into a wide view.

522 /softbox

Use clean, even studio lighting.

515 /wormseye

Use an extreme ground-level perspective.

523 /hardflash

Use sharp direct flash lighting.

516 /goldenhour

Use warm sunrise or sunset light.

524 /bokeh

Turn background lights into soft circles.

517 /bluehour

Use cool twilight lighting.

525 /lensflare

Add bright camera flare and streaks.

518 /neonlight

Use colorful neon illumination.

526 /prismatic

Create rainbow refraction through light or glass.

519 /rimlight

Create a glowing outline around the subject.

527 /oilpaint

Use rich, layered oil-paint texture.

520 /chiaroscuro

Use strong light and shadow contrast.

528 /watercolor

Use soft transparent watercolor washes.

Codeword directory

529 - 544 / 642

Every codeword includes one simple explanation.

529 /gouache

Use bold matte painted colors.

537 /papercraft

Turn the subject into a constructed paper model.

530 /inkwash

Use expressive brushwork and ink tones.

538 /origami

Use folded-paper geometry.

531 /linocut

Use carved printmaking shapes.

539 /poster

Create a bold graphic poster.

532 /woodcut

Use a vintage engraved texture.

540 /editorial

Use a polished magazine editorial layout.

533 /stainedglass

Build the subject from colored glass panels.

541 /albumcover

Create music artwork around the subject.

534 /paperquilling

Build the image from curled paper strips.

542 /comicpanel

Use a comic-book frame and composition.

535 /claymation

Use a handmade clay animation style.

543 /manga

Use a manga-inspired illustration style.

536 /clayrender

Make the subject look like a smooth clay model.

544 /pixelart

Convert the subject into pixel graphics.

Codeword directory

545 - 560 / 642

Every codeword includes one simple explanation.

545 /infographic

Explain the subject with visual information blocks.

553 /signalnoise

Create television or transmission interference.

546 /sticker

Create a clean sticker illustration.

554 /surveillance

Use a security-monitor viewpoint.

547 /labeldesign

Create a label with clear hierarchy.

555 /scanlines

Add a digital scanning pattern.

548 /educationalposter

Combine facts, labels, and diagrams.

556 /falsecolor

Use scientific false-color mapping.

549 /glitch

Add controlled digital distortion.

557 /depthmap

Use color to show distance and depth.

550 /hud

Add a futuristic heads-up display.

558 /heatmap

Highlight intensity or activity with color.

551 /datastream

Show information flowing through the scene.

559 /gridoverlay

Place a technical grid over the image.

552 /coderrain

Use falling code as the environment.

560 /mesh

Show the 3D mesh structure.

Codeword directory

561 - 576 / 642

Every codeword includes one simple explanation.

561 /cyberpunk

Place the subject in a neon future.

569 /spaceopera

Create a grand interstellar environment.

562 /steampunk

Use Victorian machinery and brass details.

570 /retrofutur

Show an old-fashioned vision of the future.

563 /solarpunk

Imagine an optimistic green future.

571 /brutalist

Use raw concrete and monumental forms.

564 /atompunk

Use 1950s nuclear-age futurism.

572 /gothicrevival

Use dramatic historic architecture.

565 /biopunk

Blend biology and advanced technology.

573 /chrome

Give surfaces a reflective metal finish.

566 /fantasyrealm

Place the subject in a magical world.

574 /glass

Make the subject transparent glass.

567 /mythic

Give the subject an epic legendary setting.

575 /holographic

Use a rainbow hologram finish.

568 /western

Place the subject in a frontier setting.

576 /lowpoly

Build the subject from faceted polygons.

Codeword directory

577 - 592 / 642

Every codeword includes one simple explanation.

577 /voxel

Build the subject from block-like pixels.

585 /longexposure

Show light trails and smooth movement.

578 /emboss

Raise elements above a surface.

586 /lightpainting

Draw glowing paths through the scene.

579 /deboss

Press elements into a surface.

587 /motionblur

Emphasize movement with directional blur.

580 /foilstamp

Add metallic foil printing.

588 /timelapse

Compress a long process into one image.

581 /diecut

Create a clean cut-out design.

589 /slowmotion

Make movement look suspended.

582 /stencil

Convert the subject into stencil shapes.

590 /stopmotion

Use a handmade frame-by-frame appearance.

583 /halftone

Use comic-book dot shading.

591 /motiontrail

Leave trails behind moving elements.

584 /duotone

Limit the design to two colors.

592 /speedlines

Add graphic action streaks.

Codeword directory

593 - 608 / 642

Every codeword includes one simple explanation.

593 /freezeframe

Capture a dramatic instant in motion.

601 /inhandscale

Show the real size in a person's hand.

594 /timeline

Show development across multiple stages.

602 /beginnerfriendly

Make the explanation simple and approachable.

595 /transformation

Show one form becoming another.

603 /lefthanded

Show the item operated left-handed.

596 /lifecycle

Show creation, use, aging, and end of life.

604 /storageplan

Show a practical storage arrangement.

597 /homeuse

Show the item being used at home.

605 /cablemanagement

Organize cables neatly around the item.

598 /deskuse

Show a practical workstation setup.

606 /drawerorganization

Arrange small items inside a drawer.

599 /kitchenuse

Show a realistic kitchen application.

607 /accessorylayout

Arrange the main item with its accessories.

600 /traveluse

Show how the item works while traveling.

608 /stickynotes

Add colorful sticky-note labels.

Codeword directory

609 - 624 / 642

Every codeword includes one simple explanation.

609 /postitwall

Create a wall of notes around the subject.

617 /labelmaker

Use tidy printed labels for each part.

610 /callouts

Add lines pointing to important details.

618 /captioncard

Add short explanatory captions beside the subject.

611 /arrows

Use arrows to show direction or movement.

619 /legendkey

Create a visual key for colors and symbols.

612 /highlighter

Highlight the most important areas.

620 /underwater

Place the subject below the water surface.

613 /redpen

Add correction marks and expert notes.

621 /watersplash

Freeze a splash around the subject.

614 /markerwriting

Use bold marker-style annotations.

622 /dropletmacro

Show suspended droplets in close detail.

615 /whiteboard

Turn the image into a whiteboard explanation.

623 /inkcloud

Show ink spreading through liquid.

616 /annotatedphoto

Add clean labels directly to the photo.

624 /fogbank

Surround the subject with thick rolling fog.

Codeword directory

625 - 640 / 642

Every codeword includes one simple explanation.

625 /rainstreaks

Show rain streaking across the view.

633 /infrared

Use infrared-style imaging.

626 /timeworn

Make the subject aged and heavily used.

634 /nightvision

Use a green night-vision view.

627 /archaeological

Present the subject like an excavation find.

635 /ultrasound

Use a medical ultrasound-style view.

628 /damagecheck

Highlight scratches, cracks, dents, or breaks.

636 /radarview

Present the subject like a radar display.

629 /authenticitycheck

Highlight details that indicate authenticity.

637 /sonar

Show distance and objects through sound.

630 /repairability

Show which parts can be repaired or replaced.

638 /magneticfield

Visualize magnetic field lines.

631 /thermalview

Show heat distribution across the subject.

639 /spectrogram

Represent sound as frequencies and color.

632 /thermalvision

Use a heat-camera perspective.

640 /soundwave

Show an audio waveform around the subject.

Codeword directory

641 - 642 / 642

Every codeword includes one simple explanation.

641 **/smellmap**

Visualize the spread or concentration of a smell.

642 **/electricalfield**

Show electrical energy around the subject.

How to use the codes

Each entry is designed to work as a standalone visual trigger.

01 UPLOAD

Add a photo, screenshot, sketch, product image, person, animal, or scene.

02 TYPE ONLY

Send the codeword by itself, for example /cutaway or /mechanism.

03 REVIEW

The codeword tells the image model what view, explanation, or transformation to attempt.

04 PRESERVE

When needed, add a short instruction to keep the original face, pose, subject, and aspect ratio.

/explodedview one word is the prompt

Upload an image, type only the codeword, and ask for labels when you need an educational result.

Best practice: Use one code for a clean result, or combine two to four compatible codes for a richer transformation.
