IMAGE-TO-INFOGRAPHIC WORKFLOW

CHATGPT LOOKSMAXX SCORECARD

Turn one ordinary selfie into a bold, shareable 9:16 dating-photo audit with realistic scores, meme-worthy copy, and a polished social layout.

UPLOAD PHOTO → PASTE PROMPT → GENERATE

01

Use a clear selfie

Front-facing is fine. The prompt will identify what the photo is hiding.

02

Paste the master prompt

It controls the critique, scores, tone, sections, and 9:16 layout.

03

Post the result

Use it as a Reel cover, TikTok visual, carousel slide, or lead magnet.

EXAMPLE RESULT

BEFORE →

AFTER

The face barely changed. The framing, hierarchy, contrast, and message did all the work.

YOU'RE NOT UGLY.
YOU'RE UNDER-OPTIMIZED.

✦ ChatGPT Looksmaxx Scorecard. ✦

CURRENT
6.9
/10

POTENTIAL
8.4
/10

3 BUFFS

- Blue eyes carry.
- Thick hair = free halo effect.
- Balanced features, solid symmetry.

3 DEBUFFS

- Passport-photo expression. Zero aura.
- Straight-on angle kills jawline.
- Lighting boosts redness, not rizz.

3 FASTEST UPGRADES

- Turn 30° + chin slightly forward.
- Use soft window light, not cave light.
- Add light stubble or sharper hair texture.

1
PHOTO

REPACKAGED INTO A COMPLETE SOCIAL POST WITHOUT CHANGING THE PERSON.

The prompt turns visible photo weaknesses into a story: current state, realistic upside, strengths, weaknesses, and immediate fixes.

COPY AND PASTE MASTER PROMPT

Upload a portrait first. Then paste this as one message.

REUSABLE PROMPT

Analyze the uploaded photo as a **brutally honest but practical dating-app photo consultant**. Give the photo a realistic **CURRENT score** and **POTENTIAL score** out of 10. Judge only what is visibly present: expression, eyes, nose, lips, chin and jawline, ears, hair, eyebrows, lashes, skin, facial balance, angle, lighting, grooming, hairstyle, clothing, background, and overall first impression.

Then transform the result into **one highly shareable 9:16 social-media scorecard**. Use the exact headline: **"YOU'RE NOT UGLY. YOU'RE UNDER-OPTIMIZED."** Use the subhead: **"ChatGPT Looksmaxx Scorecard."** Make it scroll-stopping, clean, and TikTok-readable with huge text, strong contrast, and a large central photo.

Include only: **CURRENT, POTENTIAL, 3 BUFFS, 3 DEBUFFS, and 3 FASTEST UPGRADES.** Keep every line short, witty, slightly savage, practical, and meme-worthy. Preserve the person's identity and recognizable features. Do not invent medical claims, recommend surgery, or over-retouch the face. Output one finished vertical infographic only, not a grid or multiple versions.

UPLOAD

Choose a sharp photo with the face large enough to evaluate.

PASTE

Use the full prompt without shortening the required sections.

REGENERATE

Ask for a cleaner layout only if the wording or typography is incorrect.

Best practice: treat the score as a photo-performance score, not an objective rating of the person. A better expression, angle, background, and light can move the result dramatically.

THE 4 CONTROLS

The strongest prompts control both the analysis and the final design.

01

VISIBLE EVIDENCE

The model is told exactly what to inspect, reducing vague praise and forcing practical comments about expression, lighting, grooming, and angle.

02

REALISTIC SCORE GAP

CURRENT shows how this photo performs now. POTENTIAL shows the believable upside after better presentation, not fantasy-level transformation.

03

RESTRICTED SECTIONS

Only five blocks are allowed. That prevents clutter and makes the output readable in less than two seconds on a phone.

04

CONTROLLED TONE

"Slightly savage" creates hooks. "Practical" keeps the jokes attached to actionable upgrades instead of empty insults.

EASY VARIABLES TO SWAP

Dating-app consultant

LinkedIn headshot coach

Creator profile audit

Red / black palette

Clean white editorial

Cyberpunk neon

3 buffs / 3 debuffs

Strengths / fixes

Current / optimized

PRODUCTION CHECKLIST FASTEST WORKFLOW

From selfie to finished post in one focused generation.

1

SELECT THE PHOTO

Use one person, clean resolution, natural skin, and enough room around the head for a vertical crop.

2

GENERATE THE SCORECARD

Upload the image and paste the master prompt. Ask for one finished 9:16 output.

3

CHECK THE TEXT

Verify the headline, scores, and all nine bullets. Regenerate if any wording is misspelled.

4

PUBLISH VERTICALLY

Export at 1080 × 1920 or higher. Keep the most important text inside the center-safe area.

TOOLS USED

ChatGPT

Photo analysis, copywriting, score logic, and final infographic generation.

chatgpt.com

Notion

Store the prompt as a reusable workflow template and duplicate it for future posts.

notion.so

Canva (optional)

Fix tiny text issues, add branding, or resize the finished design for other platforms.
