

14 Portrait Codes

from my reels, with every prompt

How to use them

These are not secret built-in commands. Each code is a short name for a full prompt, and the full prompt is what Chat GPT needs. So paste the whole prompt, not just the code.

1 upload a clear photo of you

Face visible, good light, no sunglasses. For the wall codes (/droneview ...), use a full-body photo of you in a street.

2 Paste one prompt below

Copy the whole text under the code. The last line, "Keep my face exactly the same", matters.

3 Not quite right? Ask for one change

"Same picture, but make the light warmer." Small follow-ups work better than starting again.

My starting photo:

/Dark Royal King Portrait

Turn my photo into a dark royal king portrait: me sitting on a tall black tufted leather throne in a dark stone hall with blue-grey haze, a long black fur coat over a black shirt, silver rings, a small silver crown, and a huge gothic silver crown sculpture on the wall behind me. Cold moody top light, deep shadows, cinematic. Keep my face exactly the same.

/Dark Fantasy Wolf Portrait

Close portrait of me in near darkness with a large white wolf pressing its head gently against my cheek, both of us looking calmly into the camera. Dark brown fur-lined coat, soft low-key side light, dark fantasy mood, but a real photo. Keep my face exactly the same.

/Mirror Reflection Portrait

Over-the-shoulder shot: the back of my head blurred in the foreground, I look into an old ornate wooden mirror and my sharp reflection looks straight into the camera. Teal-blue moody light, cinematic film look. Keep my face exactly the same.

/Cinematic Fisheye Portrait

Extreme fisheye lens, slightly high angle: me inside a round glass dome with metal frames and a stormy green-grey sky outside, pulling small oval sunglasses down my nose, light-blue oversized t-shirt, layered silver chains. Keep my face exactly the same.

/Underwater Cinematic Portrait

Me sitting relaxed on a wooden chair completely underwater in clear blue water, in a light grey pinstripe suit, one hand on a walking cane, orange goldfish around me, sun rays from the surface, hair floating slightly. Dreamy cinematic look. Keep my face exactly the same.

/ROYALKINGDOM

Close royal portrait on a dark background: an ornate gold crown with red jewels, a deep red velvet mantle with a cream ermine fur collar, a dark gold-embroidered tunic with a gold lion medallion. Calm regal expression, warm painterly light, but a real photo. Keep my face exactly the same.

/DARKFLASH

Night photo with direct on-camera flash, dark garden leaves behind me fading to black. Black suit, white shirt, loosened burgundy tie, silver chains and watch, hand under my chin, relaxed smirk. Hard flash shadows, party-photo look. Keep my face exactly the same.

/CINEMATICGRIT

Gritty boxing-film moment at a bathroom mirror at night under yellow-green fluorescent light: my bare shoulder blurred in front, my reflection sharp, a small scrape on my cheek, one hand wrapped in white tape near my mouth, sweat, heavy film grain. Keep my face exactly the same.

/FISHEYEFASH

Daylight, extreme fisheye from low and close, bright blue sky with white clouds. Black sunglasses, open grey overshirt over a white t-shirt, one open hand reaching toward the lens, the other giving a thumbs-up. Hard flash fill, street-style shot. Keep my face exactly the same.

/SILHOUETTEPORTRAIT

A pure black silhouette of my head and shoulders against a bright white studio backdrop, three-quarter angle, soft light on the edges. No facial detail, but the outline of my hair, nose and jaw is clearly mine.

/droneview

Show this same scene from a drone high above and in front: a steep top-down angle, me small at the bottom of the frame by the wall, the whole wall filling the picture. Keep me, my outfit and the place the same.

/wormseyewide

An extreme low worm's-eye view from the ground with an ultra-wide lens: the wall towers up into a bright blue sky with clouds, I stand tall in the middle, my sneakers huge in the foreground. Keep me, my outfit and the place the same.

/cinematicphoto

A cinematic golden-hour shot at eye level: low warm sun throws dappled leaf shadows across the wall and me, the rest in cool teal shade, teal-and-orange film grade, soft grain. Keep me, my outfit and the place the same.

/paparazzieditorial

A paparazzi telephoto shot from across the street: blurred dark shapes in the foreground (a passer-by, a parked car), me sharp against the wall, glancing to the side as if I didn't notice the camera. Editorial magazine feel.

want hundreds more?

My free PDF has over 400 more one-word Chat GPT photo codes, each with what it does.
