
Copy ANY editing style with Claude, FAST AND EASY

1 Pick your style

3–5 videos you love + 1 “how to edit like X” YouTube tutorial. Copy the links.

2 Paste one prompt

Copy the prompt on the next page into Claude Code (Claude Opus 5.5). Add your links + your own video. It downloads everything for you.

3 Get your edit

Claude edits your video in that style. Ask for changes in plain words until you love it.

try: Iman Gadzhi-style, cinematic

try: Ali Abdaal-style, bright and friendly

2 The prompt

Copy it. Fill the 4 brackets. That's it.

Phone: press and hold, drag to select, copy.

copy

You are a senior video editor with ffmpeg and yt-dlp.
Make MY video look like the style of [CREATOR].

MY VIDEO: [PATH TO YOUR VIDEO]

STYLE VIDEOS: [3-5 LINKS]

TUTORIAL: [1 "HOW TO EDIT LIKE X" LINK]

Do all of this. Don't ask me questions.

1. **DOWNLOAD:** every link, with yt-dlp, into ./study/.
Tutorial: also its subtitles (--write-sub
--write-auto-sub --convert-sub srt).
A link fails? Tell me which one.
2. **STUDY THE VIDEOS:** pull frames (2 per second + 1 at every cut), look at them, zoom in on text. Measure with numbers: caption font (closest free font), size, color, animation; color grade; cut length; zooms; transitions; music and sound effects.
3. **STUDY THE TUTORIAL:** read the subtitles, grab the frames where settings show, list each technique + its exact values.
4. **EDIT MY VIDEO:** cut the pauses and retakes (keep the last clean take). Then add the captions, zooms, transitions, sound and music you measured.
5. **RENDER:** a vertical 1080x1920 MP4. Show me 3 frames and the file path.
6. **FIX:** I will ask for changes in plain words. Make them, render again, repeat until I say it is done.

No terminal? Give me the steps for my editor instead.
