NOTION AI WORKFLOW

FACIAL AESTHETIC REPORT PROMPT

A clean copy-paste workflow for turning one front-facing portrait into a premium black-and-white aesthetic report infographic.

✓ Higgsfield  <https://higgsfield.ai/?fpr=johnsavage>

✓ All My Socials  <https://links.johnsavageai.com/>

1. Upload portrait

Use a clear front-facing face photo. Neutral expression works best.

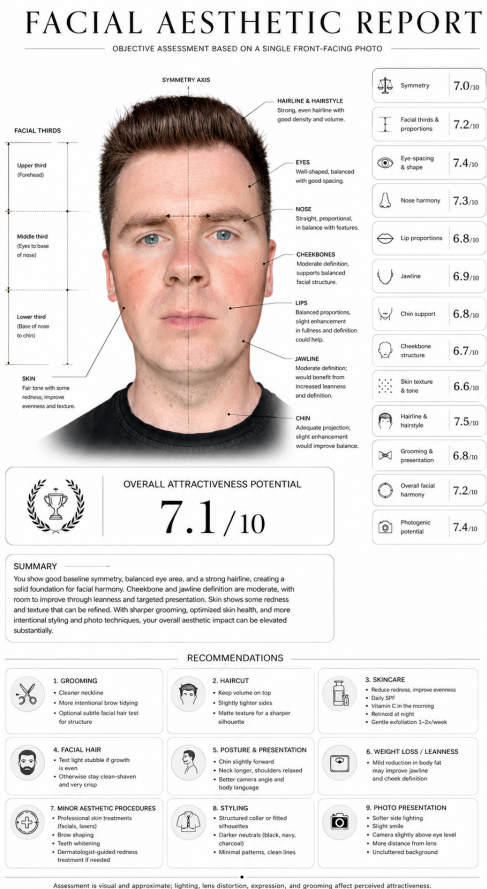

2. Paste prompt

Copy the main prompt below.
Keep the 9:16 format instruction.

3. Export result

Use the final image as a luxury-style report, carousel slide, or lead magnet.

EXAMPLE OUTPUT

MAIN PROMPT

Copy and paste this prompt after uploading your front-facing portrait.

Create a clean, minimal, high-end facial aesthetic report based on the uploaded photo, using a black-on-white editorial design with thin linework, rounded cards, generous spacing, modern typography, and a refined luxury feel. Include an isolated front-facing image of the face, presented as an analytical attractiveness-assessment diagram.

Provide an honest, objective evaluation of facial attractiveness potential, avoiding excessive flattery and focusing on symmetry, facial thirds, overall proportions, eye spacing and shape, nose harmony, lip proportions, jawline, chin, cheekbone structure, skin texture and tone, hairline, hairstyle, grooming, overall facial harmony, and photogenic potential.

Assign clear, realistic scores to each major category, along with one overall attractiveness-potential score, keeping the ratings grounded, useful, and not artificially inflated.

Include practical, achievable recommendations to improve attractiveness-potential, covering grooming, haircut, facial hair, skincare, eyebrow shaping, posture, weight loss, minor aesthetic procedures, styling, and photo presentation.

Maintain a refined, direct, constructive tone that feels elegant, credible, and easy to understand, with an emphasis on actionable improvement that builds on the subject's existing strengths.

Format: 9:16 vertical, 4K quality.

OPTIONAL MORE CONTROLLED VERSION

Use this version when you want a more structured clinic-style infographic layout with labels, cards, and a premium report feel.

Create a single-page 9:16 ultra-detailed editorial infographic in a clean, minimal, high-end luxury style. Use the uploaded front-facing portrait as the subject reference. Preserve the subject's identity and facial features faithfully, but isolate the face cleanly from the original background and present it as a front-facing analytical diagram on a pure white page.

The design should feel like a premium aesthetic clinic report: black-on-white palette, thin linework, rounded cards, generous spacing, refined modern typography, subtle gray accents, elegant grid layout, and a polished editorial feel.

Top title: "FACIAL AESTHETIC REPORT". Subtitle: "Objective assessment based on a single front-facing photo".

Main visual section: place a clean cutout of the subject's head and upper shoulders in the upper-middle area. Keep the subject realistic and recognizable. Add thin black analytical lines, subtle measurement guides, arrows, and callout labels around the face to indicate the assessed areas: symmetry, facial thirds, eye spacing, nose harmony, lips, jawline, chin, cheekbones, skin, hairline, and photogenic potential.

Include an honest and grounded attractiveness-potential assessment, not exaggerated. Use concise readable text. Include realistic scores in neat rounded cards, each clearly labeled. Use a 10-point scale with one decimal place. Include these categories:

Symmetry, Facial thirds & proportions, Eye spacing & shape, Nose harmony, Lip proportions, Jawline, Chin support, Cheekbone structure, Skin texture & tone, Hairline & hairstyle, Grooming & presentation, Overall facial harmony, and Photogenic potential.

Add one prominent overall score card: "OVERALL ATTRACTIVENESS POTENTIAL".

Include a short summary paragraph in a rounded card. The meaning should be: the subject shows good baseline symmetry, balanced eye area, a strong hairline, and solid overall harmony; the main gains would likely come from sharper grooming, skin refinement, slightly leaner facial definition, and more intentional photo styling.

Add a recommendations section near the lower half with concise actionable cards covering grooming, haircut, skincare, facial hair, posture and presentation, weight loss/leanness, minor aesthetic procedures, styling, and photo presentation.

Add a small footer note: "Assessment is visual and approximate; lighting, lens distortion, expression, and grooming affect perceived attractiveness."

Ensure the infographic is very readable, beautifully laid out, and feels like a premium magazine-quality aesthetic assessment sheet. Keep the composition elegant and text clean and legible. Use monochrome with subtle grayscale accents only.

POSTING / LEAD MAGNET NOTES

Use the generated report as a hook, then offer the prompt as a downloadable workflow. This works well for AI image, AI design, and personal branding content.

Best format	9:16 vertical for TikTok, Instagram Reels, YouTube Shorts, and PDF previews.
Best input photo	Front-facing, sharp, natural light, no heavy distortion, no extreme smile, no sunglasses.
Best caption angle	"AI can now turn one selfie into a premium facial analysis report."
Safety note	Keep the tone constructive. Do not present the scores as medical, scientific, or final truth. It is a visual creative assessment.
