80S FOOTBALL PITCH SELFIE WORKFLOW

One clean copy-paste prompt + example results. Keep the fan reference fixed, then swap the footballer reference for every new generation.

RESULT + COPY-PASTE PROMPT

Result image first, then the full one-paragraph prompt right after it.

Swap only Reference Image 2 to create new footballer versions. Keep the fan reference the same for consistency.

COPY-PASTE PROMPT

Reference Image 1 = fan identity reference. Reference Image 2 = football player identity reference. Use Reference Image 1 ONLY for the fan's face, hairstyle, skin tone, facial structure, age, clothing and body proportions. Use Reference Image 2 ONLY for the football player's face, hairstyle, skin tone, facial structure, body proportions and appearance. The fan must clearly resemble Reference Image 1. The football player must clearly resemble Reference Image 2. Create a genuine viral smartphone selfie captured during a chaotic football pitch invasion immediately after a FIFA World Cup 2026 match, but make it look like it is from the 80s era. This is NOT a posed selfie, NOT a planned photo, and NOT a meet-and-greet. This is a spontaneous moment captured in the middle of chaos. The fan has successfully reached the football player on the pitch and quickly raises the phone to capture a selfie before security removes him. The image should feel accidental, rushed, and authentic. Use a front-facing smartphone camera, vertical smartphone photo, natural wide-angle selfie lens, handheld camera shake, motion blur from sudden movement, slight framing imperfections, slight tilt, and real smartphone image quality. The photo should look like it was captured within one second during a chaotic moment. The fan from Reference Image 1 occupies the foreground and is holding the phone. The fan looks excited, shocked, and full of adrenaline, with a wide smile, eyes opened wide, and an authentic emotional reaction. The football player from Reference Image 2 is standing beside the fan and looks surprised but amused, with a natural smile and relaxed reaction. The football player is not posing professionally and appears caught in the moment. A security guard is grabbing the fan from behind while attempting to remove him from the pitch, and another security staff member is rushing toward them. The fan is partially being pulled away while taking the selfie, the fan's body is slightly off balance, the football player remains in frame, and the scene feels frozen in the middle of action. The background is inside a packed football stadium where the match has just ended, with the crowd visible in the stands, floodlights illuminating the stadium, players walking around the pitch, referees, photographers, broadcast camera operators, security personnel running toward the incident, championship atmosphere, post-match energy, and a background that feels busy and alive. The image should have strong motion energy, natural motion blur, slight subject blur, slight camera shake, authentic smartphone dynamic range, natural stadium lighting, sports journalism aesthetic, and a viral social media moment feel, like an image that would immediately spread across Instagram, X, Reddit, and sports news pages. The emotion should convey adrenaline, excitement, chaos, disbelief, joy, victory celebration atmosphere, and a rare once-in-a-lifetime fan moment. The final image should look like a real viral football selfie captured seconds before security removes the fan from the field: ultra photorealistic, authentic smartphone photography, no AI-art look, no CGI, no face swap effect, no pasted faces, no professional photoshoot appearance, no cinematic movie lighting, no staged posing, no watermark, no logo, no text, extremely realistic, and indistinguishable from a genuine viral sports photograph. (9:16)

WORKFLOW PROCESS

Keep the fan reference fixed, swap the footballer reference, then generate the final 9:16 selfie.

Workflow process

Keep the fan reference fixed, swap the footballer reference, then generate the chaotic 9:16 selfie.

Reference Image 1

Fan identity stays the same

Reference Image 2

Footballer identity changes

Final Result

Chaotic phone selfie output

Repeat: keep Reference Image 1 untouched. Replace only Reference Image 2 for Mbappe, Neymar, Haaland, Kane, Yamal, legends, etc.

EXAMPLE RESULTS

A few example outputs using the same prompt and fan reference, while changing the footballer reference.
