Mirror vs Front Camera Meme Prompt

One copy/paste prompt + the final image result example.

Image Result

Me in the mirror:

Me using my front camera:

Copy/Paste Prompt

Subject: [jim carey]. Make the person highly recognizable and accurate to their real facial features, hairstyle, age, skin tone, expression style, and signature look. Keep it realistic, like a candid iPhone photo, not AI-looking, not plastic, not overly smoothed.

Layout: two equal vertical panels side by side with a clean white header area at the top.

Top text:
Left panel text: "Me in the mirror:"
Right panel text: "Me using my front camera:"
Use bold black sans-serif font, large, clean, centered above each panel. No other text. No watermark. No logo.

LEFT PANEL - "Me in the mirror:"
A flattering mirror selfie in a public restroom/bathroom mirror. Eye-level angle, natural iPhone photo, soft diffused lighting, sharp realistic details. The subject looks confident and slightly smug, looking into the mirror/camera with a subtle confident expression. They are holding a white smartphone at arm's length. Outfit should match their recognizable public style but stay simple and realistic. Background: modern public restroom with mirror, tiled walls, stalls, sink/counter, natural bathroom lighting.

RIGHT PANEL - "Me using my front camera:"
Same exact celebrity, clearly recognizable, but shown in an exaggerated unflattering front-camera selfie. Extreme low angle looking up into the face, wide-angle iPhone front-camera distortion, visible double chin, slightly wider nose from lens distortion, harsh overhead lighting with strong shadows, puckered lips, slightly squinting eyes, messy flyaway hair strands. Wearing a dark blue hoodie. Background: light green wall with warm fairy lights. Make it funny and unflattering but still realistic and clearly the same person.

Style requirements:
Ultra-realistic iPhone photo, candid, high detail skin texture, realistic hair, real phone-camera imperfections, natural shadows, realistic bathroom reflections, no cartoon style, no over-stylization, no beauty filter, no glossy AI skin, no warped hands, no extra fingers, no duplicated phones, no distorted text, no watermark. 4:5, 4k

Replace only [jim carey] if you want to make the same format with another celebrity.
