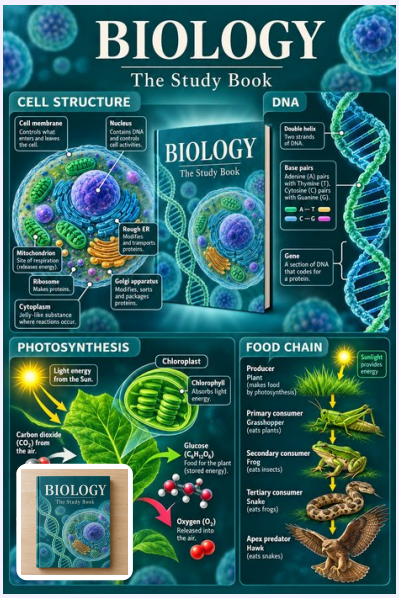
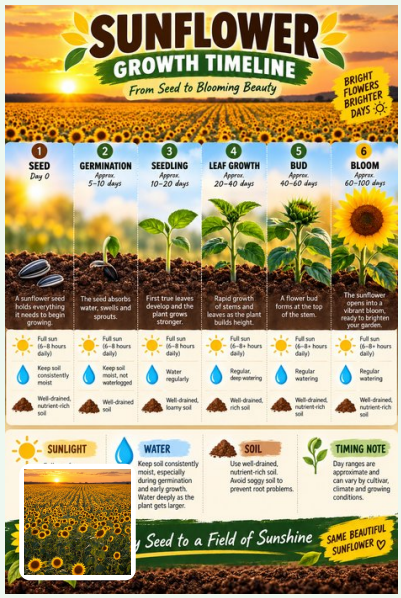
6 codes

Upload a photo, type one code. Small picture = the photo you upload.

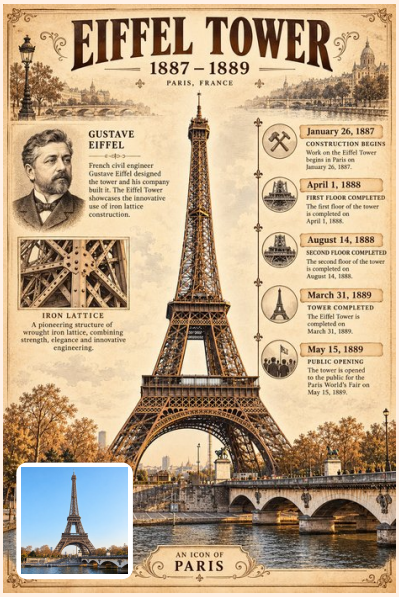


`/visual study board`

`/film shot setup`

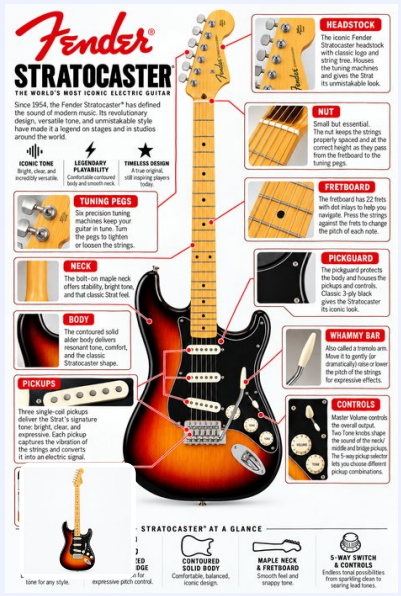


`/growth timeline board`



`/history timeline poster`

`/how it works`



`/labeled parts poster`

462 MORE CODES on the next pages

TIP Works best on a clean photo. Stack two codes, for example /explodedview /stickynotes.

Make every code work

Paste this once at the start of a chat, then just upload a photo and type a code.

MASTER PROMPT

COPY AND PASTE

```
From now on, when I upload a photo and type a /code, re-shoot the SAME photo in the style the code describes. Keep the same person (face, hair, skin tone, body), the same outfit and the same place unless the code changes them. Keep it photorealistic with natural skin texture and real imperfections, no airbrushed look, no text or watermarks. Only change what the code asks for: camera angle, lens, light, weather, season, or world. If a code is unclear, pick the most cinematic interpretation.
```

3 PRO TIPS

1. **Stack two codes:** `/droneview /goldenhour`
2. **Use a clear, well-lit photo where your face is visible**
3. **If the face drifts, reply:** `keep my face exactly the same`

STACKS TO TRY FIRST

`/droneview /goldenhour`
A warm aerial shot at sunset.

`/winter /northernlights`
Snowy ground under a glowing sky.

`/fisheye /nighttimeflash`
A wild, flash-lit party snapshot.

`/fog /wormview`
A moody low shot through thick fog.

`/tinyplanet /goldenhour`
A tiny warm planet in the sunset.

`/actionfigure /thermalvision`
A boxed toy in heat-map colors.
