JOHN SAVAGE AI / SUBMAGIC

CAPTIONS PEOPLE CAN READ **ON MUTE**

My full Submagic workflow: 7 steps, upload to export in 3 min 19 s.

THE RESULT

IN THE APP

Upload, read, style

1 Upload

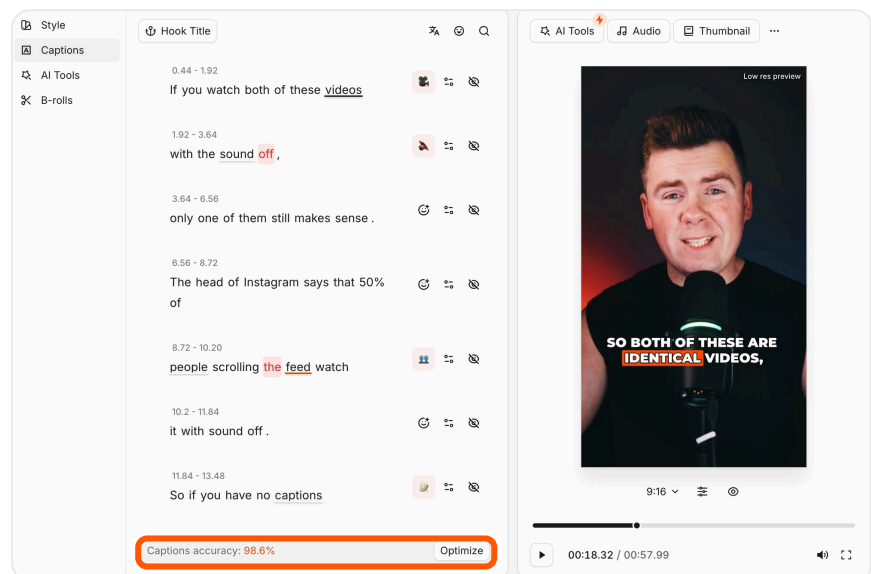

Home → **Generate Captions** → drop your video.

Drag videos here or [click to select](#)

2 Read the captions

Open the **Captions** tab. Click any word to fix it — names and brand words first.

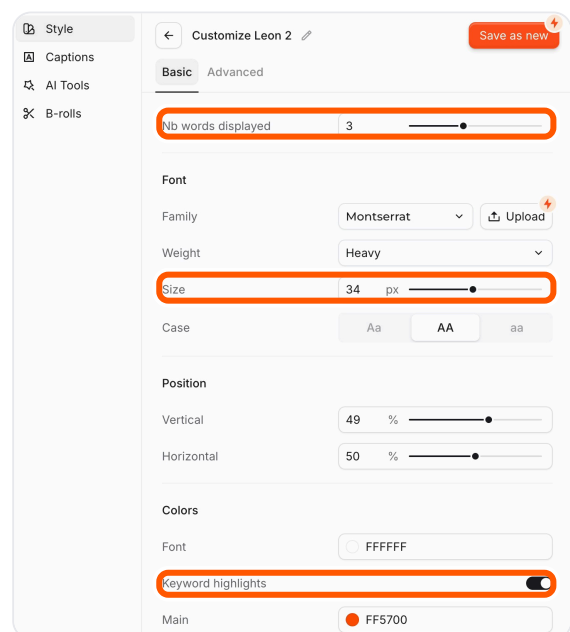

3 Style them

Style tab → pick a style (I used **LEON**) → the slider icon on it opens the settings.

MY SETTINGS

3 words · size 34 · keyword highlights on

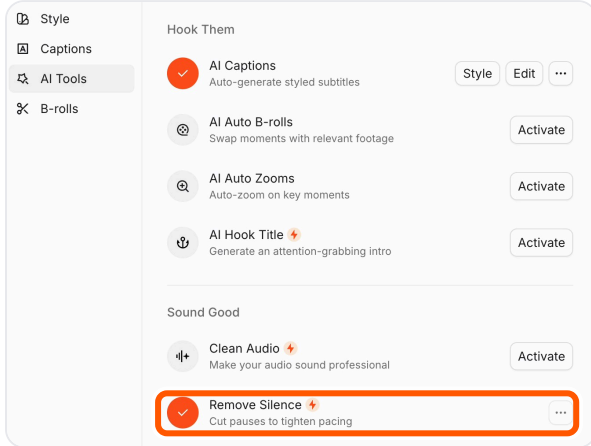

Cut, zoom, check

4

Cut the pauses

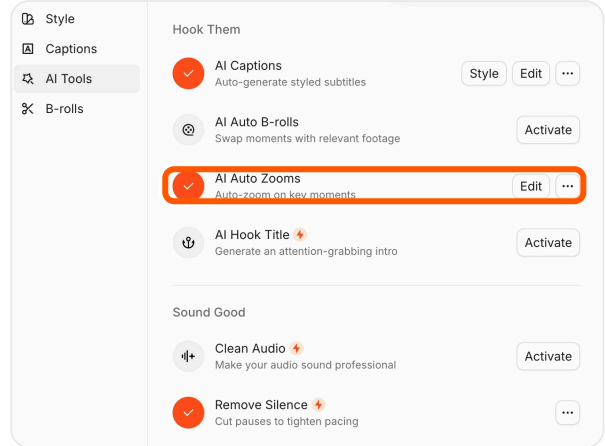

AI Tools → Remove Silence → Activate.

5

Add zooms

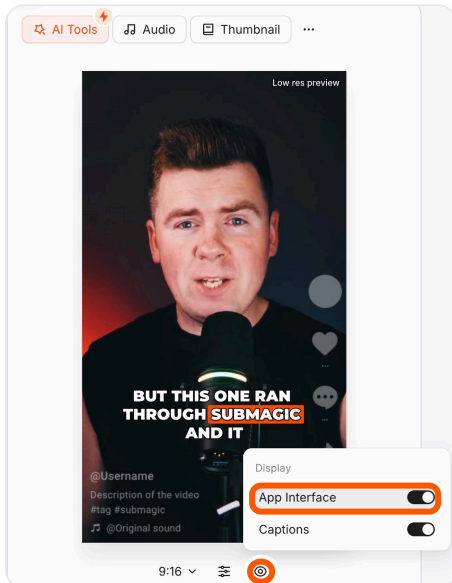

AI Tools → AI Auto Zooms → Activate.

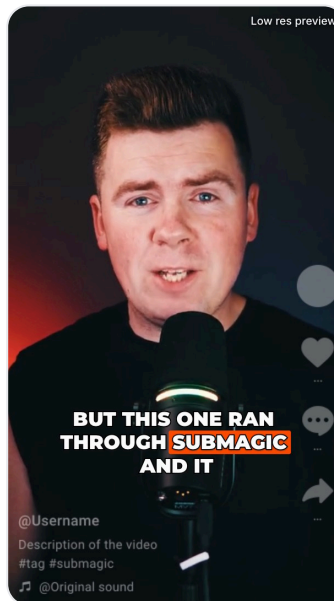

6

Check the app buttons

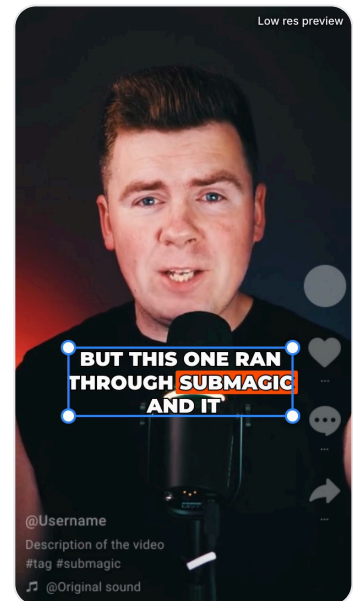

Under the preview, the **eye icon** → **Display** → **App Interface**. Drag the captions until no button covers them.

DISPLAY → APP INTERFACE ON

BEFORE

AFTER

Export + my settings
